Technology, Knowledge and Wisdom

Does technology help us gain knowledge? Does increased knowledge lead to increased wisdom? And what does wisdom say of technology?

Philosophers, scientists, and theologians have wrestled with these questions; from the utopian optimism of Pierre Teilhard de Chardin, to the sceptical pessimism of Jacques Ellul. Popular culture also wrestles with such issues, not least through movies; from *The Matrix* to *Free Guy*. Now it is our turn.

This series brings together academics from across disciplines to consider pressing issues of the interrelationships between technology, knowledge, and wisdom, and what this means for how we (should) live in today's world.

Sessions

- 4th Dec. 2021: Specialisation
- 8th Jan. 2022: Integration
- 5th Feb. 2022: Separation
- 5th Mar. 2022: Centralisation
- 2nd Apr. 2022: Transcendence

Discussion Leaders

- Dr Jonathan CHUNG (CityU)
- Dr Irene FAN (SCALE InnoTech)
- Dr Agnes CHAN (HKU)
- Rev Dr Kin Yip LOUIE (CGST)
- Prof Arthur MAK (CUHK)

Organisers
 Dr LEUNG Wing Tai
Lumina College

 Dr Mike BROWNNUTT
HKU

 Dr Winnie FUNG
Lumina College

 Info and registration:
